

Infectious Diseases Management Program Mission & Members

Mission

The Infectious Diseases Management Program (IDMP) at UCSF is a multidisciplinary program whose mission is to improve the care of patients with infectious diseases, prevent the spread of infection, and ensure the appropriate use of antimicrobials. IDMP's mission includes Antimicrobial Stewardship, Infection Control, and Clinical Microbiology. IDMP at UCSF coordinates with clinicians at San Francisco General Hospital and the Veterans Affairs Medical Center San Francisco to promote best practices across the three hospitals.
