"S" denotes predictable susceptibility "R" denotes intrinsic resistance "**" indicates data applicable only to uncomplicated urinary tract infection "S" denotes utility as synergistic agents only (GMS)

***When fewer than 30 isolates are reported, % susceptible may not reflect robust estimate of population susceptibility

Antibiotic color code (streamline to narrower agents when appropriate): **Green** = narrower-spectrum/first-line agent **Yellow** = broader-spectrum agents **Red** = broadest-spectrum/last-line agents

Additional information:

- Values (%) indicate the % of tested isolates that were SUSCEPTIBLE to the antibiotic by in vitro testing.

- Dollar signs indicate approximate cost of one day of therapy: \$=0-5 dollars, \$\$=5-25 dollars, \$\$\$=25-50 dollars, \$\$\$=\$=50-100 dollars, \$\$\$=\$=\$=over 100 dollars

- Dollar signs separated by the "/" indicate cost difference between pediatric dose versus adult dose
